

A GOOD REASON TO JOIN CARMECHANICA

# EQUIPMENT INVESTMENT

Every owner realises the necessity of having the right, up to date equipment throughout their workshop. As the in-built technology in cars continues to advance, there will be an even greater need for additional equipment. However, car servicing is bread & butter for independent workshops and the right tools and equipment in this area of the business can improve productivity, efficiency, and profit.

## How CarMechanica can help:

We have established an investment fund of \$1m to help CarMechanica members finance the equipment they need for fast, efficient car servicing and pay it off with their lubricant purchases over two or 3 years.

Equipment for oil management such as tanks, lines, dispensers and drainers as well as hoists, benchtops and diagnostic tools could be funded by MotorActive, interest free! Naturally, terms & conditions apply so ask us for details.
